**Abstract**

Didi Chuxing is the worlds leading mobile transportation platform that offers a full range of mobile tech-based mobility options for over 550 million users. Every day, DiDi's platform receives over 108TB new data, processes more than 40 billion routing requests, and acquires over 15 billion location points. This talk is about how AI technologies have been applied to analyze such big transportation data to improve the travel experience for millions of people in China.
